SUMMARY

B.S. Cybersecurity Systems student at Milwaukee School of Engineering seeking a hands-on cybersecurity internship in incident response, vulnerability management, SOC, or systems security. Experienced in security incident analysis, vulnerability remediation, Linux system hardening, and secure operations, with proven ROTC leadership and strengths in risk assessment and team coordination. Proficient in Linux, scripting, and Java.

EDUCATION

B.S. Cybersecurity Systems | Milwaukee School of Engineering | Expected May 2028

TECHNICAL SKILLS

Cybersecurity: Risk Assessment, Vulnerability Management, Incident Response, System Hardening

Programming & Scripting: Java, Python (Beginner), Bash

Systems & Tools: Linux (Ubuntu, Kali), Windows Server, VMware, VirtualBox

Languages: Spanish (Fluent), French (Conversational), Arabic (Basic)

Private Pilot License | Purdue University Aviation & Transportation Technology Program | 2024

Aim High Flight Academy | California Aeronautical University | 2023

PROJECT EXPERIENCE

Object-Oriented Application Development — Solo

- Developed 6+ Java applications (500–1,200 LOC) using object-oriented design patterns, interfaces, and modular architectures.
- Implemented robust input validation, exception handling, and file-based data processing to ensure reliability and maintainability.
- Applied UML-driven design to translate requirements into scalable, production-ready code.

Custom Data Structures Implementation — Solo

- Engineered 5+ core data structures (linked lists, stacks, queues, trees, hash-based structures) and evaluated performance tradeoffs using Big-O analysis.
- Improved data retrieval and processing efficiency by up to 40% through optimized structure selection.
- Validated implementations with automated unit tests covering 90%+ of critical logic paths.

GUI-Driven Data Application — Team (3–4 members)

- Built a Java-based GUI application handling 1,000+ records with responsive, event-driven user interactions.
- Collaborated in a shared codebase using Git, contributing 20+ commits while resolving integration and merge conflicts.
- Delivered a stable, user-focused application meeting defined performance and usability requirements.

Agile Software Engineering Project — Team (4–5 members)

- Contributed to a multi-sprint Agile development effort delivering 15–20 prioritized features using Scrum practices.
- Created system and sequence diagrams to support architectural decisions and development planning.
- Used GitLab for version control, issue tracking, and code reviews, contributing 25+ commits across sprints.

MILITARY & WORK EXPERIENCE

AFJROTC / August 2022 – May 2024

Operations Squadron Commander / May 2023 – Dec 2023

Enforced security protocols with 98% compliance, led incident response initiatives reducing resolution time by 35%, and conducted operational risk assessments to improve process safety and resilience.

Mission Support Squadron Commander / Aug 2022 – May 2023

Led a 50-member team to ensure efficient resource allocation and maintain strong operational security, while optimizing inventory and asset tracking to reduce excess stock by 50% and discrepancies by 45%.

Summer Program Assistant / MSOE / May 2025 – Aug 2025

Supported technical operations and safety for 200+ participants; resolved 20+ issues to improve reliability.

LEADERSHIP & COMMUNITY SERVICE

Youth Advisory Council Member / Truman Heartland Community Foundation / Aug 2021 – May 2024

- Led safety-focused initiatives that strengthened event security processes while improving cross-functional coordination, risk mitigation, and overall preparedness.

President / AFJROTC Kitty Hawk Academic Society / May 2022 – Dec 2023

- Directed cybersecurity simulations and promoted secure data handling practices, reducing unauthorized access risk by 30% and improving team analytical effectiveness.
